HIGH-DENSITY DUAL BAND BASE SECTOR ANTENNA
WiBOX SA M4DBC245-65-9HV NF

WiBOX SA M4DBC245-65-9HV NF is dual band concurrent (DBC) (2.4 and 5 GHz) H&V polarity MIMO 4x4 panel antenna. It can operate at two frequencies simultaneously, at 2.4 GHz and at 5 GHz. According to medium gain, it can be used on short and medium distances, for example for hotspots in schools, stadiums, offices or some public places. Can work also with mobile devices. It can work indoor and outdoor (IP67) as well. Wide frequency band (2.4-2.5 GHz & 4.9-6.0 GHz) allows to easily find suitable frequency for the operation. The antenna comes with No. 4 N Female connectors, and it’s designed for work in concurrent dual band technology, which means that SA M4DBC245-65-9HV NF radiates simultaneously at both operating frequencies using only one single connector for 2.4 and 5 GHz signal. It’s predicted for special Access Points working in the systems where two bands (frequencies) are diplexed in one antenna connector, from the companies as Cisco, Aruba Networks, Huawei, Xirrus and others. The antenna is integrated with the top quality WiBOX Medium system with no installation compartment.
